

NAAN MUTHALVAN PROJECT

**TRACING THE GROWTH OF THE  
GLOBAL COMMUNITY: A POPULATION  
FORECASTING ANALYSIS**

## INTRODUCTION:

### OVERVIEW:

**The world's population is more than three times larger than it was in the mid-twentieth century. The global human population reached 8.0 billion in mid-November 2022 from an estimated 2.5 billion people in 1950, adding 1 billion people since 2010 and 2 billion since 1998. The world's population is expected to increase by nearly 2 billion persons in the next 30 years, from the current 8 billion to 9.7 billion in 2050 and could peak at nearly 10.4 billion in the mid-2080s.**

**This dramatic growth has been driven largely by increasing numbers of people surviving to reproductive age, the gradual increase in human lifespan, increasing urbanization, and accelerating migration. Major changes in fertility rate have accompanied this growth. These trends will have far-reaching implications for generations to come.**

### PURPOSE:

The program aims to enhance the employability, innovation, and entrepreneurship skills of students through hands-on, project-based learning under the guidance of industry mentors. It helps students acquire technical and professional competencies while working on real-world challenges and creating innovative solutions. The program encourages students to think critically and creatively, and it is designed to provide industry-level training at the college level.

## PROBLEM DEFINITION AND DESIGN THINKING:

# Empathy Mapping

## Aziel paulaseer prem raja

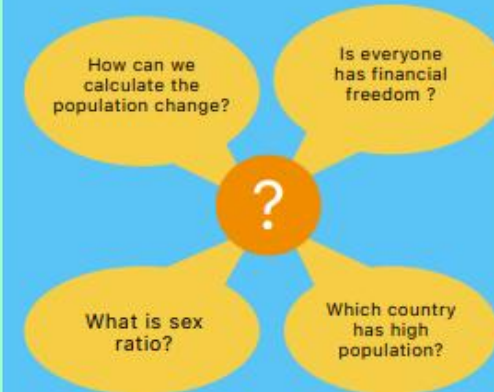

## Bharath
